PROFESSIONAL SUMMARY

Motivated BS Information Technology student (7th semester) at International Islamic University Islamabad with a well-rounded foundation across networking, cybersecurity, databases, and software development. Holds the Google Cybersecurity Professional Certificate and has self-studied CCNA-level networking, alongside hands-on project experience in Python, C++, and full-stack web development (MERN). Combines technical versatility with proven leadership through roles at MLSC IIUI and Computer Science Society Islamabad, where he has led operations and marketing initiatives for student-run technical communities.

EDUCATION

BS Information Technology

International Islamic University Islamabad (IIUI) | Current Semester: 7th

2023 – Present • Islamabad, Pakistan

- Relevant Coursework: System & Network Administration, Information Security, Database Management, Cloud Computing, Operating Systems, Data Structures & Algorithms, Web Technologies

PROJECTS

Voice Assistant | Python, CustomTkinter — Academic Project

- Built a fully functional desktop voice assistant using Python with a modern GUI developed in CustomTkinter, supporting voice-activated commands for system tasks and web queries
- Implemented speech recognition and text-to-speech modules, demonstrating skills in Python libraries and event-driven programming
- Designed a clean, responsive interface using CustomTkinter's theming system, improving usability and user experience

Banking System | C++, OOP, Modular Design — Academic Project

- Developed a multi-module banking system in C++ covering account creation, deposits, withdrawals, fund transfers, and transaction history
- Applied Object-Oriented Programming principles including encapsulation, inheritance, and polymorphism to structure banking entities
- Implemented data validation and error-handling logic to simulate real-world security controls such as PIN verification and transaction limits
- Designed modular architecture separating account management, transaction processing, and reporting for maintainability and scalability

Role-Based Authentication System | MERN Stack, JWT — Academic Project

- Designed and implemented a JWT-based authentication system supporting three distinct user roles with secure session handling
- Built using MongoDB, Express, React, and Node.js with role-based access control across the application

TECHNICAL SKILLS

Cybersecurity	Foundations of Cybersecurity (Google), Networking Security Fundamentals, Threat Identification, Risk Awareness
Programming	Python (OOP, GUI, Voice libs), C++ (OOP, Modular Design), JavaScript, PHP, HTML/CSS
Databases	Oracle Architecture, MySQL, SQL, Tablespaces & Privileges
Design & Web	Web Design & Development (NFTP), Graphic Design, Vector Tracing, Adobe Illustrator (basics)
Full Stack Development	MERN Stack, REST APIs, Full Stack Web Development (NASTP — In Progress)
Tools & Platforms	Git/GitHub, VS Code, CustomTkinter, Cisco Packet Tracer, Linux (basics)
Soft Skills	Team Leadership, Operations Management, Marketing & Outreach, Event Coordination

CERTIFICATIONS & TRAINING

- Google Cybersecurity Professional Certificate — Foundations of Cybersecurity | Google (Coursera)
- CCNA — Self-Study (Routing, Switching & Network Authentication Protocols)
- Web Development | NFTP (2024) — Website Designing and Development
- Graphic Designing | NS Training (2025) — Fundamentals and Vector Tracing
- Full Stack Web Development Certification | NASTP — In Progress

LEADERSHIP & EXTRACURRICULARS

Operations Lead | MLSC IIUI (Microsoft Learn Student Community)

- Managed day-to-day operations of one of IIUI's leading technical student communities, coordinating events, workshops, and team activities

Marketing Lead | Computer Science Society Islamabad

- Led marketing and outreach campaigns for CS Society events, growing digital engagement and student participation
- Collaborated with cross-functional teams to plan and promote technical competitions, seminars, and awareness drives

LANGUAGES

Urdu (Native) | English (Professional Proficiency)
